

Channel Vision's block filters are used to pass all lower channels below cable channels below 60, 78, 105, 118 or a channel of your choice and block (clean up) frequencies above that channel. Use these filters to remove unwanted cable company or interference. These filters will provide the best quality picture on the channel you wish to modulate. Prevent a callback by using a low pass filter on every installation. Custom frequencies available upon request.

Filter Description:

Channel Vision Technology is a manufacturer of video distribution components, with over 240 products including convenience, peace-of-mind, and improved quality of life. Product line includes: broad line of RF modulators with stereo audio for multi-room video distribution, phone-line entry systems, B&W and color surveillance cameras, flush mount cameras, modular RF and CATV distribution panels for structured wiring and home theater distribution for surround sound and multiple zones.

- Instructions:**
- Step 1:** Look at selected channel prior to inserting filter into the system.
 - Step 2:** Connect the filter on the incoming cable line prior to amplification or modulator combiner.
 - Step 3:** Look at selected channel to verify picture is clean snow, without any lines or interference at four channels beyond the filter channel. **IE:** 3102-78 would be clean after channel 82.
 - Step 4:** Insert modulator into the system and check

Channel Vision Limited Warranty

Channel Vision Technology will repair or replace any defect in material or workmanship which occur during normal use of this product with new or rebuilt parts, free of charge in the USA, for two years from the date of original purchase. This warranty does not cover damages in shipment, failures caused by other products not supplied by Channel Vision Technology, or failures due to accident, misuse, abuse, or alteration of the equipment. This warranty extends only to the original purchaser.

A purchase receipt, invoice, or other proof of original purchase date will be required before warranty repairs are provided.

Mail in service can be obtained during the warranty period by calling (714) 424-6500. A Return Authorization number must be obtained in advance and be marked on the outside of the shipping carton.

This warranty gives you specific legal rights, and you may have other rights (which vary from state to state). If a problem with this product develops during or after the warranty period, please contact Channel Vision, your dealer, or any factory-authorized service center.
