

P-0328A

Thank you for purchasing Channel Vision's P-0328A 3x8 Amplified Splitter/Combiner. The P-0328A is a patent pending amplified splitter and combiner technology with upgrade capabilities that are unmatched in RF technology. There are a variety of options that can be configured with this product which include adding an RF modulator, TV antenna or any RF carrier to a separate input while utilizing 1 RG6U cable to send the signal to a TV up to 300 feet away. In addition, the IR injects control signals into the existing cable for control of source equipment at the main distribution point.

Features

- Unity Gain on all CATV ports (54-1000MHz)
- Return Path (5-42MHz) for interactive TV
- Compatible with Channel Vision IR-4100 or IR-4101 IR over coax injectors
- Built in IR engine
- Fits inside structured wiring enclosures
