

3101 Cable Box Combiner Kit

Channel Vision's 3101 Cable Box Combiner Kit is used to bypass a cable box converter when the cable box won't pass a modulated channel.

The 3101 cable box combiner takes the incoming Cable or Antenna signal and splits it. One output goes to the cable box, the other gets filtered and is then re-combined with the output of the cable box and sent to your TV, effectively bypassing the cable box.

Specifications:

Loss: 6.5dBmV at Output
