

CHANNEL VISION™

3112 CAT5 Audio/Video Interface

Channel Vision's **3112** CAT5 Audio Video Interface allows audio, video, power and IR signals to be connected through a single CAT5 cable. This flexible device can be used to convert traditional cameras into CAT5-compatible cameras or to extract audio and video from the Monitor 2 output of the Channel Vision P-6014 CAT5 Camera Sequencer. The 3112 can also be utilized to provide a simplified connection between CAT5 cable and an IR receiver or emitter.

3112

Features:

- Converts any standard camera to CAT5 cable
- Adapts IR receivers to CAT5 cable
- Works with the P-6014 CAT5 Camera Sequencer
- Cost-effective and easy-to-install
