

CHANNEL VISION™

A4623 4-Input 6-Zone Amplified A/V System

Channel Vision's A4623 is a 4-Input, 6-Zone Amplified A/V System designed for whole-house audio/video distribution. The system provides both an amplified 20Watt speaker output and a pre-amp output for each of the 6-zones making it easier to add a high powered amplifier for more demanding applications. Any of the 4-source inputs can be selected and routed to any of the 6-outputs (or zones) independent of the other zones. The A4623 is also available with a rack mount face plate as model A4623R.

A4623/A4623R

Features:

- Built-in Amplifiers: 20 Watts per channel
- Pre-amp outputs for adding more amplification
- 4 composite video inputs
- Distributes 4 A/V sources to 6 different zones
- Provides IR and RS-232 control options for touchscreen integration and status feedback
- Link IR between multiple units
- Cost-effective and easy-to-install

*Specifications: (typical @25° C)

Audio

- Bandwidth:** 20-20kHz +/- 3dB
Power Output: 20W per channel
S/N ratio: >80dB
THD: < 0.5%

Video

- Bandwidth:** DC-20MHz
Crosstalk: -60 dB

*Specifications subject to change without notice.
