C-0310 10dB Amplifier

Channel Vision's 10dB power injected amplifier increases the strength of the incoming cable or antenna signal for longer runs to more outputs. Unlike most RF amplifiers, the C-0310 uses an external power supply that can be connected directly to the unit using a coax "F" connector. For added versatility, an optional power injector may be used to feed power back to the amplifier from a remote location, thereby eliminating the need to install the C-0310 near a power outlet.

Features:

- 1 in 1 out 10dB Amplifier
- For remote power, use model# CVT-PI
- Bi-directional power injected down the coax
- 5-42MHz return path for interactive TV
- 54-1000MHz forward path
- UL and CSA approved

Dimensions: 6-3/8" (l) x 2-1/2" (h) x 1-3/4" (d)

Specifications:

- | | |
|--------------------------|-------------------------|
| ➤ Bandwidth 45-1000Mhz | ➤ Output Power +10dB |
| ➤ Gain 10dB +/-1.5 | ➤ Dist. X-Mod. -70dB |
| ➤ Flatness +/-1dB | ➤ CTB -65dB |
| ➤ Return Loss (min) 14dB | ➤ Power Supply 12V/55mA |
