

CHANNEL VISION *Central*

C-0622 & C-0623 Fiber Optics Termination Products

Channel Vision's C-0622 is a simple but necessary product that facilitates FTTP (Fiber To The Premises). While fiber optics technology is capable of moving amazing amounts of signal from one point to another, it can be difficult to terminate the cable. The C-0622 provides a spool which allows the installer to coil excess cable and terminate it in the C-0623 fiber optics duplex coupler.

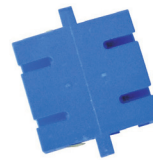

C-0622

Fiber Optics termination and wire management module
(includes spool cover and C-0623 SC type coupler)

C-0623

SC type coupler
Included with C-0622 and sold separately

Features:

- Wire spool cover for a cleaner look
- Includes C-0623 SC-type connector
- Quick and easy installation

Specifications: (typical)

C-0623 connector

Insertion Loss:	0.15dB(SM), 0.2dB(MM)
Return Loss:	65dB typical
Temp. Range:	-40 to +75 degrees C
Durability:	<0.2dB change after 500 cycles.

Specifications subject to change without notice.
