

CHANNEL VISION *Central*

C-1321 Hinged Expansion Plate

Channel Vision's C-1321 is a hinged expansion plate that provides a second layer of grid space for mounting Channel Vision modules. It attaches to the enclosure extension ring (model C-1351). The C-1351 can hold 3 hinged expansion plates. The C-1321 is the perfect solution to an over-crowded structured wiring enclosure because it creates the room you need by utilizing wasted space above other modules, yet it hinges open to allow access to the modules and wiring underneath it.

C-1321

Shown above:
Three C-1321's mounted in a 50" extension ring

Features:

- Quick and easy installation
- Creates more space in crowded installations
- Hinge allows easy access to modules located behind the C-1321
- Oval-shaped holes to accommodate 3rd party modules.
