

ARIA 6.5 Angled High Performance In-Ceiling Loudspeaker

IC625

Channel Vision's ARIA IC625 6.5" in-ceiling custom installation speaker features high power handling capability providing true stereo quality sound and not simple background music. The 15° angled woofer and pivoting tweeter can be aimed to any position to custom fit any room, making these speakers perfect for home theater and whole-house audio applications. High quality materials ensure long life and great performance. Gold speaker wire terminals not only provide better contact surface but also offer less resistance to signal transfer for clearer sound.

Features
