

CHANNEL VISION™

P-1205 Amplified Zoneable IR Hub

The **P-1205** is part of Channel Vision's **PRO-Series** product line which is designed to bridge the gap between structured wire modules and products intended for standard 19" equipment racks. This amplified IR hub can be mounted almost anywhere: in a structured wire enclosure, on a P-1300 hinged rack mount plate, or screwed to a wall. The P-1205 features versatile connection options, easy expansion, and a special zoned IR* function.

P-1205

Features:

- Easily expandable to create multiple IR zones
- Both screw terminal and 3.5mm plug connections
- Mounts into structured wiring enclosures
- Compatible with any standard 12Volt IR receiver
- Power supply included
- Easy-to-install
