12" Plastic Enclosure C-0113

Channel Vision's 12" plastic enclosure is the perfect housing for wireless systems such as Google Airplay and Sonos because it does not interfere with the transmission of the wireless signal. The C-0113 is constructed of rigid plastic, making it both durable and lightweight, and has innovative mounting slots that allow it to be installed and properly adjusted for the desired drywall depth quickly and efficiently. The C-0113 is a cost-effective solution for installers to implement structured wiring and is exclusively sold in packs of 5.

Features

- Hinged Cover Included
- Easy mounting slots
- Compatible with all Channel Vision structured wiring modules
- Knockout for a standard junction box

Benefits

- Does not interrupt transmission or affect quality of wireless systems such as Sonos or Google Airplay
- Lightweight, yet durable plastic
- Quickly mount between studs in a standard 2x4 wall or surface mounted to any finished wall
