

Residential Access Control

TE110 Telephone Entry System

Channel Vision's Telephone Entry System creates a communication link between your front door and every telephone in the house. The TE110 sends a distinctive ring to every telephone when the doorbell is pressed. Simply pick up any telephone handset and press “#” or “*” twice to begin speaking to the visitor. The TE110 also includes an option to operate a door strike relay when used with the TE110DS (sold separately). Combine this unit with a Channel Vision RF modulator and IU or DP series camera for a complete and easy to use residential audio/video access control package.

Features:

- Uses Existing Phone Wiring
- Doorbell Button Sends A Distinctive Ring To Phones To Alert You That A Visitor Has Arrived
- Seamless Call Waiting
- 3 different distinctive ring patterns
- Surface Mount Components For Longer Life
- Enclosure: C-0111 (12-3/4” x 7-1/2” mini security panel) includes Lock and Key
- 2-Year Warranty
